

## **IT Project Manager (Groningen, NL)**

TVILIGHT B.V. is a European market leader in professional end-to-end lighting control solutions, with an installed base of over 200 projects in iconic cities across the globe. We specialize in delivering software, wireless devices and sensors to manage and control citywide lighting infrastructure. We see streetlights as one of the most valuable public assets that have a powerful role to play in making cities energy-efficient, resilient and future-ready. Tvilight's open software platform allows integrating a multitude of third-party applications and constituting a reliable, future-proof base for Smart Cities and IoT.

We are looking for an experienced Project Manager to join our dynamic and multi-disciplinary development team. Our development team consists of Embedded Software Engineers, Hardware Engineers and Server Software Engineers located in Groningen (the Netherlands) and Ahmedabad (India).

In this function, you will coordinate and drive development projects from gathering requirements through to the deployment/ release phase. You will report to the Technical Director.

### **Key Responsibilities and Tasks**

- Developing project goals, plans and budgets; identifying resources needed including subcontractors
- Organizing and managing all phases of the project to ensure on-time completion
- Managing and coaching the project team
- Monitoring and guarding project progress for a number of simultaneous projects
- Reporting project status to the Management Team
- Developing and implementing improvements in the project management processes

### **Professional Qualities**

- Minimum 3 years of relevant experience in managing SW development projects
- Proven hands-on experience in software development
- Affinity and experience with hardware development is preferred
- Experienced with Agile and waterfall project management techniques would be a plus
- Excellent oral and written communication skills in English
- Persuasiveness, and strong interpersonal skills and the ability to work effectively with colleagues and external partners
- Result and goal-oriented mentality
- Strong analytical and organizational skills
- Master's (preferred) or Bachelor's degree in ICT, Software Engineering, Electronics Engineering or similar

## Personal Qualities

- Able to work within a multi-cultural international team
- Driven to make a positive contribution to a fast-growing young tech company
- No 9 - 5 mentality
- International travel (10% - 20% of time) is a requirement for this position

We offer competitive salary, benefits, and a casual and fun environment that encourages quality, creativity & excellence.
