Job description:

We are looking for a great Front-end web-developer with proficiency in React.js. Your primary focus will be on developing user interface components and implementing them following well-known React.js workflows. You will be working on various parts of our cloud-solution for smart-lighting. You will join a team of Enthusiastic multi-disciplinary developers, where your focus will be on further developing and maintaining a couple of Front-end UI and advance web applications. You will be encouraged to participate in architectural discussions and think-along in solutions in more a broader way.

What do we expect from you?

- You have a pro-active attitude
- You can work independently in an environment with a lot of personal freedom
- You are a team-player, participating in discussions
- You can think in end-to-end solutions
- You are not afraid to learn/touch techniques outside your comfort-zone.

This position is for IntelliKconnect Solutions Pvt. Ltd, Ahmedabad.

Key Requirements

- Proven experience with **react framework & Javascript.**
- Experience with popular React.js workflows (such as Flux or redux)
- Familiarity with RESTful APIs.
- Experience with **& HTML & CSS/LESS/ SASS**
- Experience in working with **OAuth 2.0**
- Construct visualization that are able to depict vast amounts of data.
- Responsible for developing new highly responsive, web based user interface
- Exhibit problem-solving and analytical thinking abilities. Should be system-level thinker.
- Able to learn and apply new state-of-the-art tools and techniques and thereby showing experience in quick prototyping methods followed by structured implementation.

Nice to have:

- Nodejs
- Angularjs framework knowledge
- Websocket
- Experience with MVC Patterns

Why Join us?

TVILIGHT is a European market leader in professional end-to-end lighting control solutions, with an installed base of over 250 projects in over 20 different countries.
